Luckily for you, round 12 is here to fulfill that weirdly narrow definition for you. Enjoy the sweet, sweet feeling of having burrowed your way into these two hearts. You deserve it.

Glad to see Steam creating a home for these older games. I used to play this as a kid and it was nostalgia that motivated me to buy this and it's a little bit easier to play now that I'm older, but totally the same. If you're a fan of casual games made by Popcap that are easy to pick up and put down, this is a good game to check out.. i buy it for nostalgia,but wtf u cant play zombie offline!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! WTF. For all its faults, Cults & Daggers is an interesting and fun take on turn-based 4X games. It's got a great premise, multiple roads to victory, and a rule set that isn't crazy tough to learn. It's surprisingly fun managing the operations of your pet religion, sending marching orders to your disciples, and preaching to or manipulating cities, and quashing the Old Gods.

It's not perfect. In fact, the events summary at the beginning of each turn is particularly horrible for such a critical part of the game's interface. It could have used a nice scrollable and easily digestible format of events that you can read through. Still, just on uniqueness of premise and solid, challenging strategic play, I'd say it's a good buy for fans of turn-based menu-driven strategy games looking for something different.. I'm really proud of myself today because I finished an adventure game without using a walkthrough.. This is a brilliant piece of software for understanding vectors, plotting functions and altering the parameters as you view them in real time. It makes the maths my students normally sleep through much more exciting and experiential. Also, once they have seen the functions in three dimensions it is much easier for them to understand them written out. I highly recommend it for teachers or struggling studentrs.

The vector cross product tool alone is worth its weight in gold for explaining orthogonal product vectors!. Meet was here (2018 August).

hope everyone's doing great.. When I was a young lad and still had much to learn about the world, I told my father, "I wanna be jezos", to which he responded, "You're adopted you little shit\u2665\u2665\u2665\u2665".

Now all was good and well because this meant that I could only have a higher chance of being chosen to be Jesus' vessel upon his return to our frivolous world.

Jesus Christ RPG Trilogy allowed me to experience what it is like to gather holy water for hours on end, burst my ears with gospel and press all the buttons on my cheap keyboard in an attempt to learn the controls.

The experience of being freshly baptized, being snaked by judas and secretly knowing that Joseph is secretly my father was all quite soothing to the soul.

10V9 recommend ~IGN. Fantastic, classic beat 'em up. Love the art style. Really dig the vibe and ambiance too.

Played 3 stages so far. Mechanically no issues. Each stage was kept fresh to avoid the monotony plagued by the bad titles in the genre.

For the negative:

- 1) Overall player movement could be sped up a little. Hard to pull off the dash, especially using a stick on a xbox pad. Little stiff - more fluidity would be nice and hopefully addressed in an update.
- 2) Can get a little too reliant on crowd control button to avoid getting pummeled by a group of thugs at times. If #1 is addressed somehow, it would help this issue as well maybe.

I miss games like this. Pick it up if you're a fan of any of the other great side scrolling beat 'em ups to come out in the last decade like:

Double Dragon Neon (really, really good)

Castle Crashers

Fight 'n Rage

Foul Play

Mother Russia Bleeds

Scott Pilgrim

Streets of Rage Remake (indie)

TMNT: Turtles Time Reshelled

Zombie Vikings

etc.. Pros:

-The voice acting. It's bad but in an endearing way. Like there's a part where the monster is chasing you and it's supposed to be growling-but honest to god it just sounds like a grown man meowing at you.

-Art is good

-backgrounds are interesting enough

-The plot is interesting enough to keep you entertained

-I actually liked the characters well enough

Cons:

-the end?? Like i have no idea if i got the wrong end or something but its pretty much just a cliff hanger that never gets resolved. Who knows. Maybe he's planning a sequel or something

-So. Much. Walking. Abdulla, my guy, you do not need to use that many paths. Especially if you're going to have the player use the entire map the whole game

-Some of the puzzles were infuriating

-I know everyone has mentioned this before but the writing on the ground is corny as hell

In conclusion: For a first game its pretty good. if you have four bucks to spare and enough energy to slog through the tedious parts (\*coughcough\* walking \*coughcough\*), then go for it.. Dafuq am i playing???

Really nice adventure game with a solid atmosphere and mystery. If you're a fan of adventure/mystery games or Nancy Drew, then this is a solid pickup. Just don't expect any handholding when it comes to the mystery, though.. I've been waiting for updates, but they've stopped. Even without the updates, it was still a good game.. I deeply enjoy playing this game. I purchased both this version and the mobile version a long while ago, both of which I enjoyed playing through and would recommend to anyone who enjoys biking or gaming. When playing with a controller the stick sensitivity was an issue for me, so a sensitivity bar in the options menu wouldn't go amiss (unless i've missed one somewhere), also I really like the first person camera, and spent a good half an hour-45 minutes playing 1 level over and over just because I enjoyed it so much. In order to fully enjoy this I feel that this may require some patching and control changes, such as forward and backward on the sticks on a controller, instead of left and right. Other than these small issues (and a couple of bugs, which, lets be honest, are HILARIOUS), this game is awesome and I love it to bits. :). Still fun without any friends.

10/10. Even as a free game, not worth it. Couldn't tell if my gun was even working because for some reason, the enemies seem to do more damage in the practice mission. If you don't have patience, avoid it. Optimization is also CRAP. The game isn't Kingdom Come Deliverance pretty. It's pretty average yet it runs poorly in 4K. I may have a non TI version of the GTX 1080 but it's not a reference card. It comes close to TI performance because of the OC scanner from Asus. Not the best card at all anymore but this game should not be running at around 45-50 fps on a game that certainly isn't groundbreaking. Plenty of other mech games out there, this isn't worth the time.
